**Mini-Classic II™ Distiller Specifications**

- Mini-Classic II™ is constructed of top-quality, stainless steel to provide years of dependable service with an absolute minimum of care.
- Air-cooled design produces three quarts (US) of pure steam distilled water in approximately 4 hours, operating on 110 volts AC, 50 Hz and using 800 watts at only 7 amps.
- Compact design: 15.75" high x 13.75" wide x 9.875" deep.
- Shipping wt: 27 lb; net weight: 24 lb.
- Unique timer stops system automatically at the end of each distilling cycle.
- Distiller incorporates continuous self-sterilization when in operation and is equipped with a removable, all-stainless-steel boiling tank for easy filling and cleaning.
- This unit is perfect for small family, medical, dental or small industrial application where no waterline hookup is required.
- Unit is complete with degassing vent and carbon post filter to ensure utmost purity and removal of trace organic chemicals which may occur in some tap water sources.
